

# LOWER UTILITY COSTS ARE BUILT INTO EVERY ENERGY STAR® LABELED HOME.

Money Isn't All You're Saving

With the EPA-backed ENERGY STAR label, you can be certain your new home is at least 30% more energy efficient than a standard home. Special features are built into every ENERGY STAR labeled home. Look for a combination of tight construction, properly installed insulation, high performance windows, and high-efficiency heating and cooling equipment—and watch your utility bills go down.

For a free guide, call  
800-654-2765.

**To buy a new home that helps you and the environment, contact a participating builder today at [www.arizonaenergystarhomes.com](http://www.arizonaenergystarhomes.com).**
